Projects

Hotel Administration System — Shirdi — Date period

"The Hotel Administration System is a powerful software solution designed to streamline operations for hotel administrators and owners. With features tailored to manage reservations, track room occupancy, monitor customer payments, and oversee maintenance tasks, it provides a comprehensive platform for efficiently handling all aspects of hotel management. Through intuitive interfaces and real-time updates, administrators can easily access critical information such as room availability, guest payments, and maintenance schedules, enabling effective decision-making and ensuring smooth operations."

- Reduced the evaluation time for the system by 60%, by introducing a python based tool to automatically check for system regressions

UPI ATM System — Shirdi — Date period

"The UPI ATM System offers cardless cash withdrawals through secure QR code authentication, revolutionizing traditional banking."

- Enhanced convenience for users: Enable users to withdraw cash from ATMs without the need for a physical ATM card, offering a modern and hassle-free alternative to traditional banking transactions.

Engineering Mate Application — Pune — Date period

"Engineering Mate: Your comprehensive academic companion, offering diverse study materials and resources to enhance learning.

- Engineering Mate aims to optimize student learning experiences by providing a centralized platform for accessing diverse study materials and resources.

Feedback Evaluation System — Location — Date period

The Feedback Evaluation System empowers Sinhgad SKN students to provide valuable feedback, enhancing academic experiences and fostering continuous improvement.

- "Enhancing student satisfaction and academic quality through systematic feedback collection and analysis."
